Mining Phase

Exploration and Development

AT A GLANCE

Orezone Gold Corporation (TSX: ORE OTCQX: ORZCF) is a Canadian mining company operating the open pit Bomboré Gold Mine in Burkina Faso. Orezone has worked patiently and diligently through the early mining cycle stages before literally pouring first gold in 2022 in West Africa's Burkina Faso. As activity, spending, and investment ramped up, Orezone Gold was unphased. Through its partnership with Caron Business Solutions, Orezone has the operational and financial management solution to help it scale and extract value at every phase of its operation.

FULL STORY

CHALLENGES

Moving from the exploration and evaluation phases, through construction and into production, meant Orezone needed additional capabilities beyond core accounting. However, a tight timeline meant that any solution must be deployed and operational quickly.

SOLUTIONS

Orezone's trusted business partner, Caron Business Solutions, recommended a suite of complementary applications that integrate with Sage 300 and provide the advanced industry capabilities the company needs to scale operations.
